

# Looking for Product or Manufacturing Partner

Sierra specializes in laminating and coating web-based raw materials.

Tell us something about what you want to make:

- Is the web paper, paperboard, film or non-woven?
- What is the function of the chemical coating?
- What is the product's next use? (i.e. rolls, sheets or die cut?)

Simply describe your product's needs and intended application. A member of our team will be in touch shortly with information about how Sierra can develop your product.
