

Specialty Substrates & Coatings

Sierra applies coatings to create high performance substrates. We build custom web materials by coating and/or laminating a variety of papers, films, and synthetic materials. Sierra is the right choice to help you meet your high performance product specifications.

We produce and can help you develop high function substrates with:

Heat seal for all types of food and package goods
Blister packages for consumer package goods
Adhesives both permanent and PSA for tapes and labels
Silicone release for food processing
Barrier for food packaging
Print receptive for paper and film that work with digital, Flexo or offset
Opaque/opacity for printing stocks and tickets
Anti-skid/anti-slip
Anti-static
Anti-microbial
Slip for converting processes
Flame retardant
Hard coats
Chemical resistance
Abrasion resistant decoration

Coatings include: Aqueous coatings, hot melt, solventless, waterborne, and color concentrates.
